Unit 20875 Level 2 Credits 5 v3 (Connexis)

Attach and Move Loads Practical Training Tasks

When doing the unit Attach and Move loads the practical training tasks require the following

Task 1 Attach and Move a Freely suspended load

For this task we need a jib attachment/slide on the forks attachment/certified lifting attachment/anchor.

We need certified/tagged lifting chains/web slings and shackles

A suitable load to lift and place

Task 2 Pull a Load with a Tirfor

For this task we need to attach a tirfor (chain puller) to pull a load (deadman or heavy item that can be dragged)

This will require an anchor point plus load skates or rollers plus shackles and web sling
